

Trial 2

Lentil Time of Sowing Trial

Sponsored by DuPont

Aim: over a number of years and different season determine the optimum sowing time of lentils (Digger).

Results:

| time of sowing | yield (t/ha) |
|-------------------------------|-------------------------------------|
| May 8 | 1.31 |
| June 12 | 0.65 |
| July 7 | 0.43 |
| Significant difference | P<0.05 LSD=0.38 |

Interpretation: the optimum time for sowing lentils, for the 1996 season, was in early to mid May.

* This trial will be repeated in 1997
